

# Bachelor of Science with a Major in Computer Science

## Selected Educational Outcomes

1. Students will design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs.
2. Students will demonstrate ability to use current techniques, skills, and tools necessary for computing practice.
3. Students will apply mathematical foundations, algorithmic principles, and computer science theory in the modeling and design of computer-based systems in a way that demonstrates comprehension of the trade-offs involved in design choices.

## Examples of Outcome Assessments

The department assesses the extent to which the program requirements create the desired outcomes by a variety of techniques. Examples of these assessments include the following:

1. The capstone courses are used to assess student progress since taking Area F courses. They determine if students have mastered effective oral and written communication skills, acquired critical analysis skills, and learned to use the library and technological resources in solving non-routine problems. Assessment methods include student projects and presentations.
2. Student examinations and samples of student work are kept in the department and are examined by the faculty to assess student content knowledge.
3. Available student and alumni survey data collected by the University will be examined to determine student satisfaction with their undergraduate preparation for further education or employment.

## Requirements for the Bachelor of Science Degree with a Major in Computer Science

|   |  |    |
|---|--|----|
| <b>Core Curriculum</b>  |  | 60 |
| Core Curriculum Areas A-E (See VSU Core Curriculum)   |  | 42 |
| Majors in Computer Science are required to take MATH 1112 or MATH 1113 or MATH 2261 in Area A and MATH 2261 or MATH 2262 in Area D. |  |    |
| Core Curriculum Area F  |  |    |
| CS 1301   | Principles of Programming I                                  | 4  |
| CS 1302   | Principles of Programming II                                 | 4  |
| CS 2620   | Discrete Structures  | 3  |
| MATH 2261   | Analytic Geometry and Calculus I ( "spillover" from Area D ) | 1  |
| MATH 2262   | Analytic Geometry and Calculus II                            | 4  |
| D.2.a Laboratory Science (with 2 hours "spilling" into Supporting Courses)  |  | 2  |
| <b>Senior College Curriculum</b>  |  | 60 |
| CS 3200   | Computer Ethics  | 3  |
| CS 3101   | Computer Organization  | 3  |
| CS 3335   | The C Programming Language                                   | 3  |
| CS 3410   | Data Structures  | 3  |
| CS 3520   | Algorithms   | 3  |
| CS 4345   | Operating Systems  | 3  |
| CS 4121   | Data Communications and Networks I                           | 3  |
| CS 4321   | Software Engineering I                                       | 3  |
| CS 4721   | Database Design I  | 3  |
| CS 4500   | Formal Languages and Automata Theory                         | 3  |
| CS 4900   | Senior Seminar   | 3  |
| Additional 3000-level or 4000-level courses in CS (except CS 4800)  |  | 3  |
| Additional 4000-level courses in CS (except CS 4800)  |  | 3  |
| Supporting Courses  |  | 11 |
| D.2.a Laboratory Science ("spillover" from Area F)  |  |    |
| MATH 2150   | Introduction to Linear Algebra                               |    |
| MATH 3600   | Probability and Statistics                                   |    |
| MATH 4651   | Numerical Analysis I   |    |

|  |                       |            |
|--|-----------------------|------------|
| or MATH 4901                               | Operations Research I |            |
| Electives                                  |                       | 10         |
| <b>Total hours required for the degree</b> |                       | <b>120</b> |

### **Additional Notes**

1. The 12-hour lab science requirement must include a two-course sequence. All three courses must be from Area D.2.a. Students not completing these requirements in their Core Curriculum must complete them with elective courses.
2. Students must receive a "C" or better in all of the lower division mathematics and computer science courses completed to satisfy the degree requirements.
