

Department of Early Childhood and Special Education

*Dr. Janet Foster, Interim Department Head
Room 1160, Education Center*

The Department of Early Childhood and Special Education is a diverse department with programs that lead to a Bachelor of Science in Education (B.S.Ed.) degree. The major in early childhood education results in initial GaPSC certification in Early Childhood (P-5), and the major in early childhood special education results in initial GaPSC certification in both Early Childhood and Special Education-General Curriculum (P-5).

The programs in the department are designed to prepare professional educators who manifest the knowledge, dispositions, and competencies deemed necessary to enhance young children's overall intellectual, social, emotional, and personal growth and development. The design of the undergraduate professional program includes a variety of methods and content courses. These courses are supported by structured field experiences designed to provide opportunities to meld theory with practice in field-based interactions with young children.

Selected Educational Outcomes

1. Program graduates will demonstrate an acceptable level of content knowledge.
2. Program graduates will demonstrate an acceptable level of teaching competency for an extended period of time during the student teaching experience by planning, delivering, and assessing appropriate instruction for pupils who represent a diverse population and who are in public school settings.
3. Program graduates will integrate technology into instruction, assessment, and communication.
4. Program graduates will demonstrate characteristics of reflective practitioners by evaluating the effects of choices and actions on others (pupils, families, and other professionals in the learning community).

Examples of Outcome Assessments

1. Students in initial teacher education programs will demonstrate content knowledge through passing the state-required content assessment.
 2. Students in initial teacher education programs will demonstrate pedagogical content knowledge and knowledge of evidence-based strategies through development of lesson plans identifying use of research-validated procedures and effective content pedagogy.
 3. Students in initial teacher education programs will demonstrate skills in assessment, instructional strategies, use of technology, and monitoring and modifying instruction during observed teaching episodes evaluated by a university supervisor and P-12 mentor teacher.
 4. Students in initial teacher education programs will demonstrate their ability to positively impact P-5 learning through a Teacher Work Sample (TWS).
